Create UI to interact with Application

HOME PAGE:

REGISTRATION PAGE:

The screenshot shows a web browser window with the address bar displaying the file path: `C:/Users/MADHUBALAN/OneDrive/Desktop/implementation%20of%20webapplication/Create%20IBM%20DB%20And%20Connect%20With%20Python/template/register.html`. The page features a dark, blurred background image of a woman sitting at a desk with a laptop. Overlaid on the left is a white registration form titled "Register" with a placeholder `{{msg}}`. The form contains three input fields: "Enter Username" (with a person icon), "Enter the password" (with an envelope icon), and "Enter your email" (with a lock icon). Below these fields is a "Register" button. At the bottom of the form, it says "Already have an account? [Login now](#)". On the right side of the background image, there is a text overlay that reads: "Complete miles of journey with one step" and "Let's get started".
